

NOSORB™

NON-ABSORBENT CAT LITTER FOR EASY URINE COLLECTION

NOSORB™ is the original non-absorbent cat litter developed to provide an easy way to collect urine samples from cats for urinalysis. Designed by practicing veterinarians and endorsed by veterinary nurses, this diagnostic tool provides a non-invasive way to collect urine. Other indications for use include monitoring hydration and kidney function and as part of a routine work-up.

Features:

- ◆ 98% acceptability by cats as litter resulting in efficient collection
- ◆ Available with a sealable specimen cup for convenient out-patient use or in bulk tub for in-hospital use
- ◆ Non-absorbent, inert, disposable granules make it easy to collect a urine sample
- ◆ Other indications for use include monitoring hydration and kidney function and as part of a routine work-up.
- ◆ Preferred by veterinary nurses

Directions: Just clean the litter pan and add **NOSORB™**. The cat will urinate as usual.

Packaging: 6-pack specimen cups and 5 lb. bulk
